

## Schaublin Expanding Arbor F

### Internal Clamping for F-Type Seating

Schaublin presents a new solution for the internal clamping of parts. Instead of inserting the F-type collet, simply insert the expanding arbor, that's it. There is no adjustment required for the seating and no other accessories are required. The interchangeable sleeve is pre-machined and soft to allow an easy adjustment to various clamping requirements. The presented F38 type is capable of internal clamping in the range of  $\varnothing 20$  to  $\varnothing 38$  with lengths up to 26 mm.

**Other sizes will follow shortly..**
